

$$1) \angle CAD = \angle CDA \Rightarrow CA = CD$$

$$\angle EAD = \angle EDA \Rightarrow EA = ED$$

$CA = CD, EA = ED \Rightarrow \triangle ACE = \triangle DCE \Rightarrow$
 $\Rightarrow \angle ACE = \angle DCE \Rightarrow CE$ — биссектриса,
 а. м. к $\triangle ACD$ — равнобедр., но и высота.

$$2) \angle AEH = 90^\circ - 50^\circ = 40^\circ$$

$$\angle BEA = 80^\circ$$

\Downarrow

$$\angle BEC = 180^\circ - 80^\circ - 40^\circ = 60^\circ$$

$$3) \angle EDC = 80^\circ - 50^\circ = 30^\circ$$

$$4) \angle ECD = \frac{180^\circ - 2 \cdot 80^\circ}{2} = 10^\circ$$

$$5) \angle ABE = 180^\circ - 2 \cdot 80^\circ = 20^\circ$$

$$6) \text{ По теореме синусов в } \triangle ECD: \frac{ED}{\sin 10^\circ} = \frac{EC}{\sin 30^\circ} \Rightarrow ED = \frac{EC \cdot \sin 10^\circ}{\sin 30^\circ}$$

$$7) \text{ По теореме синусов в } \triangle BEA: \frac{EA}{\sin 20^\circ} = \frac{BE}{\sin 80^\circ} \Rightarrow EA = \frac{BE \cdot \sin 20^\circ}{\sin 80^\circ}$$

$$8) EA = ED$$

\Downarrow

$$\frac{EC \cdot \sin 10^\circ}{\frac{1}{2}} = BE \cdot \frac{\sin 20^\circ}{\sin 80^\circ}$$

$$\sin 80^\circ = \cos 10^\circ, \text{ т. к. } 80^\circ + 10^\circ = 90^\circ$$

$$EC \cdot 2 \sin 10^\circ = BE \cdot \frac{\sin 20^\circ}{\cos 10^\circ}$$

$$EC \cdot 2 \cdot \sin 10^\circ \cdot \cos 10^\circ = BE \cdot \sin 20^\circ$$

$$EC \cdot \sin 20^\circ = BE \cdot \sin 20^\circ$$

$$EC = BE$$

$$9) \text{ Значит, } EC = BE, \angle BEC = 60^\circ \Rightarrow \triangle BCE - \text{равносторонний, т. е. м. ж.}$$
