### Task 2

1) A    6) B

2) B    7) A

3) B    8) C

4) C    9) C

5) A    10) B

### Task 3

1) B

2) B

3) A

4) A

5) A

## Task 4

Our modern world can be compared to a train.

It rushes at breakneck speed and it seems to us not to stop and not to change. Recently, we listened to music on a cassette recorder and now many teenagers do not know what a cassette. We really can't change this world? I believe that we can. Scientists discover something new every day. Athletes are always changing our understanding about possibilities of the human body. Even a simple office worker supports the world economy with his boring work. Each of us can change the world with their work. And the fact that our world looks so unstoppable proves that we are all alike and want the same things.
