

4. People on Earth aren't alone. In company with us it's inhabited by animals and plants.

We call animals "our smaller brothers" and love them. Many of them become our pets.

The first pets were horses and dogs. Then man tamed a lot of animals.

Many people keep dogs and cats in the house today.

The nature of these animals is different.

Dogs are very faithful.

They love us and yearn without. Cats are very

independent. They in  
contrast allow us to  
love them. Many people  
also keep birds. Birds  
entertain their owners,  
and parrots can also  
talk to him. Aquarium  
fish also have place  
in the house. Aquarium  
with fish calms.

Any pet helps its  
owner to become kinder  
and better. People who  
have pets are calmer.  
Pets help us to  
understand nature and  
the world around us.

2.
